

RECOMMENDED SOUTHERN ROCKY MOUNTAIN POLLINATOR CONSERVATION SEED MIX

A native seed mix specially designed to provide foraging and nesting resources for a diversity of pollinators

- ◆ Approximately 16 species of annual and perennial wildflowers to provide high quality sources of pollen and/or nectar
- ◆ Includes native bunch grasses that provide nesting habitat for bumble bees and other beneficial insects
- ◆ Appropriate for habitat restoration in the Southern Rocky Mountains (elevations between 6,000 and 10,000 feet in Wyoming, Colorado & New Mexico)
- ◆ Minimum order: 1 lb. You may purchase the exact amount needed for your project.
